

Swedish Intensivist Society Meeting November 16-18, 2016  
at Sigtunahöjden Conference

Greet van den Berghe  
State of the Art Lecture over Critical Care Nutrition

Discussion questions

1. Glucose control
2. Early feeding
3. Autophagy

## Discussion questions

1. Glucose control
  2. Early feeding
  3. Autophagy
- 
- ```
graph TD; A[1. Glucose control] --> B[a. How tight?]; A --> C[b. Medical and surgical patients?]; A --> D[c. Hypoglycemia]; A --> E[d. Insulin??]; B --> F[a. Successful EN?]; B --> G[b. Day 5 - 8 -10?]; B --> H[c. Composition of early nutrition?]; B --> I[d. Hypocaloric feeding?]; C --> J[a. A hypothesis or more?]; C --> K[b. Autophagy and protein degradation]; C --> L[c. Stimulation and inhibition]; C --> M[d. In some or all patients?];
```

- a. How tight?
- b. Medical and surgical patients?
- c. Hypoglycemia
- d. Insulin??

- a. Successful EN?
- b. Day 5 - 8 -10?
- c. Composition of early nutrition?
- d. Hypocaloric feeding?

- a. A hypothesis or more?
- b. Autophagy and protein degradation
- c. Stimulation and inhibition
- d. In some or all patients?
