

## **International Forum on Perioperative Safety & Quality (ISQ) – 1 June 2018, Copenhagen, Denmark**

There are many good reasons for traveling to Copenhagen early this June. Join us on June 1, 2018 and discover practical safety tools, innovative and proven concepts, and global strategies during the second edition of the [International Forum on Perioperative Safety & Quality \(ISQ\)](#) in Copenhagen, Denmark .

We believe patient safety and quality is a leading issue in perioperative care. While these important topics will also be addressed at Euroanaesthesia, ISQ participants will have the exceptional possibility to discuss them at length with the [pioneers in the field of patient safety and quality](#).

By the ISQ, European Society of Anaesthesiology (ESA) and American Society of Anesthesiologists (ASA) intend to contribute to creating the required change.

The ISQ will bring together health care leaders and practitioners committed to improving perioperative safety and quality. Here you will find the unique opportunity to:

- Attend the **Key-note Lecture “Safer healthcare: strategies for the real world” by Prof. Charles Vincent (Oxford, UK);**
- Gain **new knowledge about fatigue risk management and the role of simulation for improving patient outcomes;**
- **Enhance your knowledge of basic patient safety tools and about learning from errors.**

The number of places is limited, don't wait and register now! For more details visit <https://www.asahq.org/ifpsq>.
