PFAS

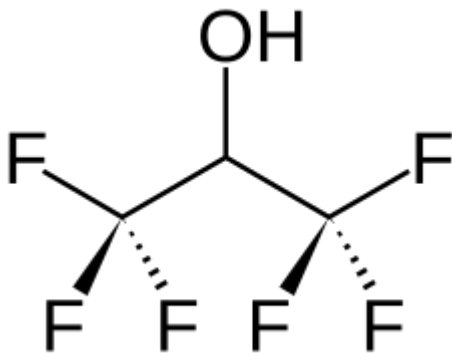

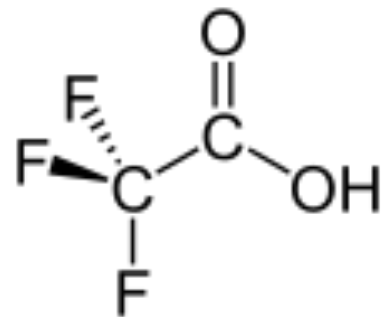

Sevoflurane

HFIP

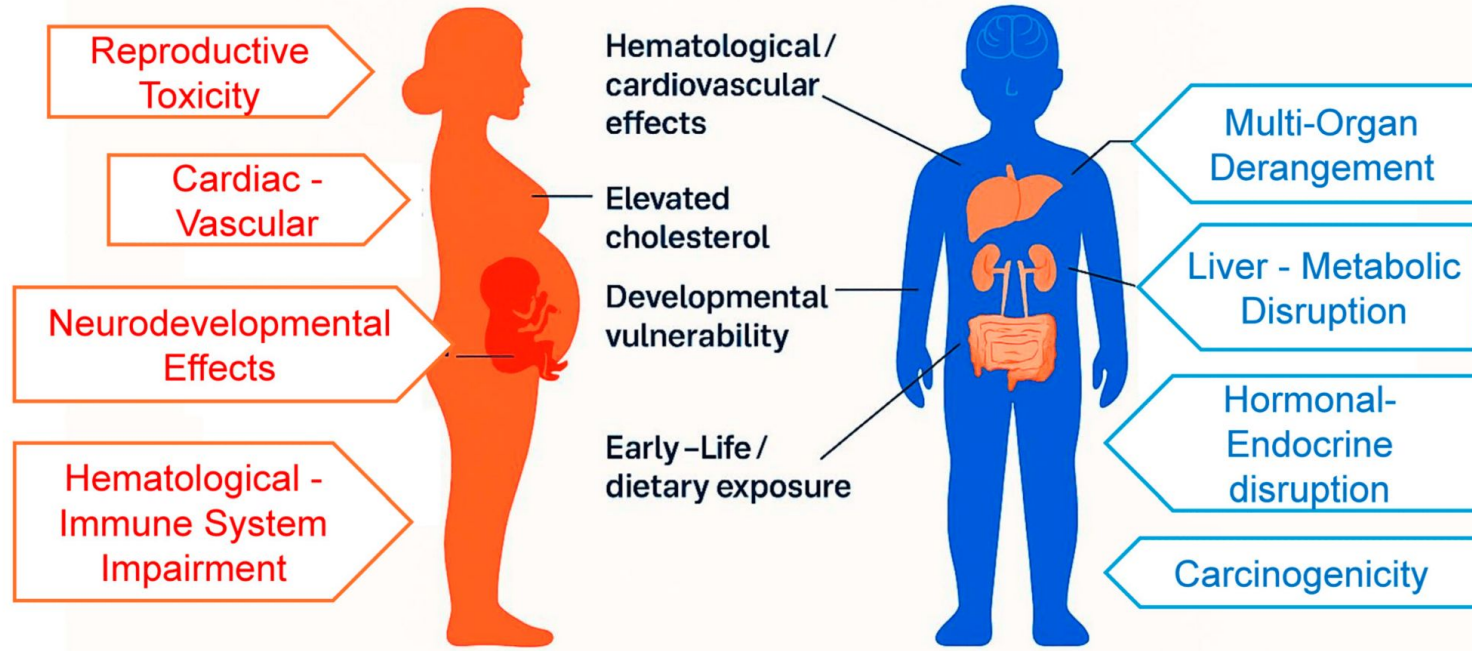

TFA

Toxicological Effects of PFAS Exposure on Vulnerable Populations

PFAS are linked to a range of adverse health outcomes. High-risk groups include pregnant women, infants, children, and intensive care patients.

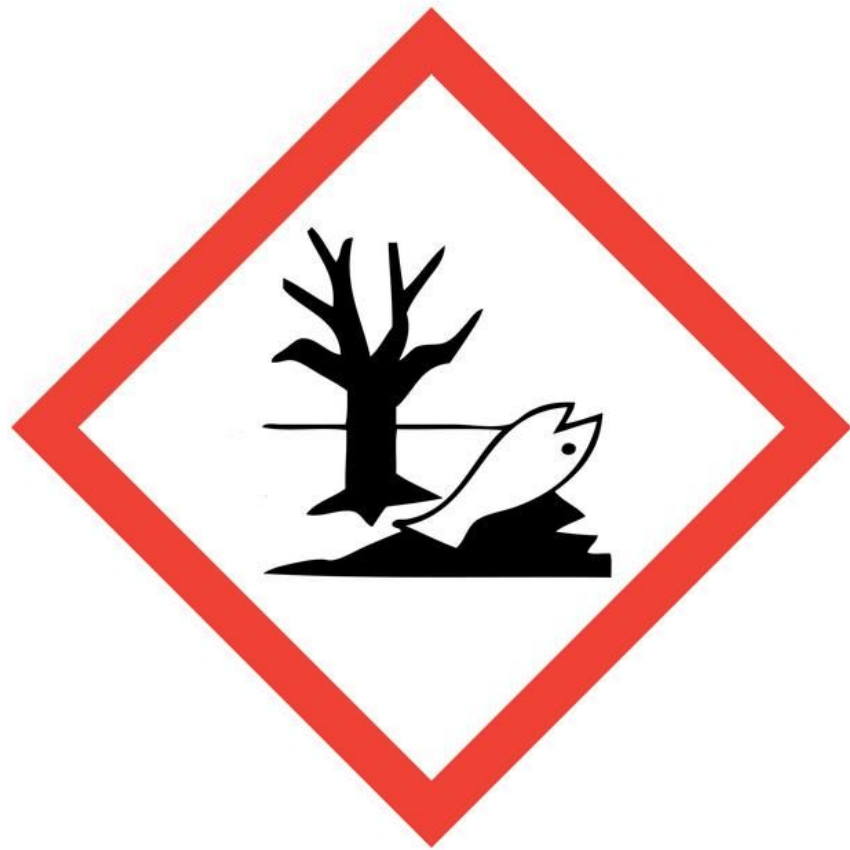

EU vattendirektiv: PFAS-total < 0,5 µg/L

“Varje narkosläkare förorenar årligen 4 miljoner kubik dricksvatten”

A photograph showing a large, black, cylindrical pipe extending from a concrete structure on the left. The pipe is discharging a thick, dark, blackish liquid into a body of water on the right. The water in the body is a murky, yellowish-brown color. The pipe's opening is partially obscured by the dark liquid being poured. The concrete structure is weathered and shows signs of age. The overall scene suggests an industrial or environmental setting, possibly related to wastewater treatment or chemical discharge.

SEVO vs PROPOFOL

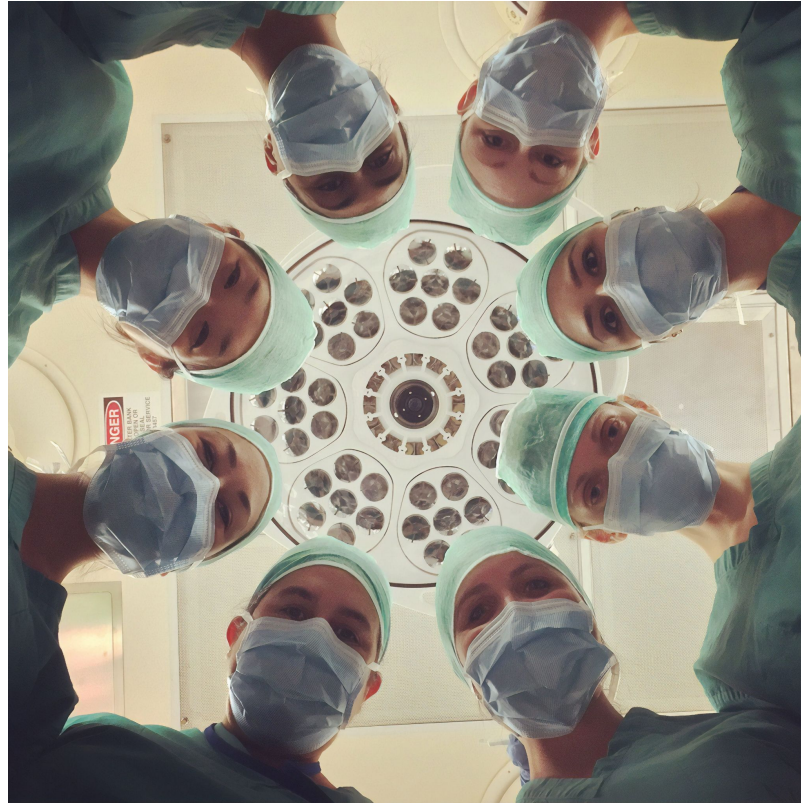

Gas anestesi är dyrare

- sevoflurane > propofol
- CO2 absorber
- PONV profylax
- Capture system
- Vatten rengöring
- TFA skador
- PFAS Skatt 1g=1eur

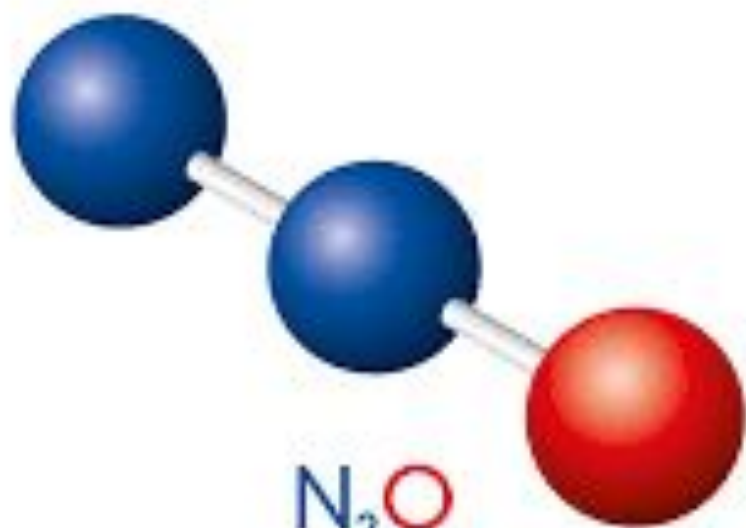

Sevoflurane, USP
(Inhalation Anesthetic)

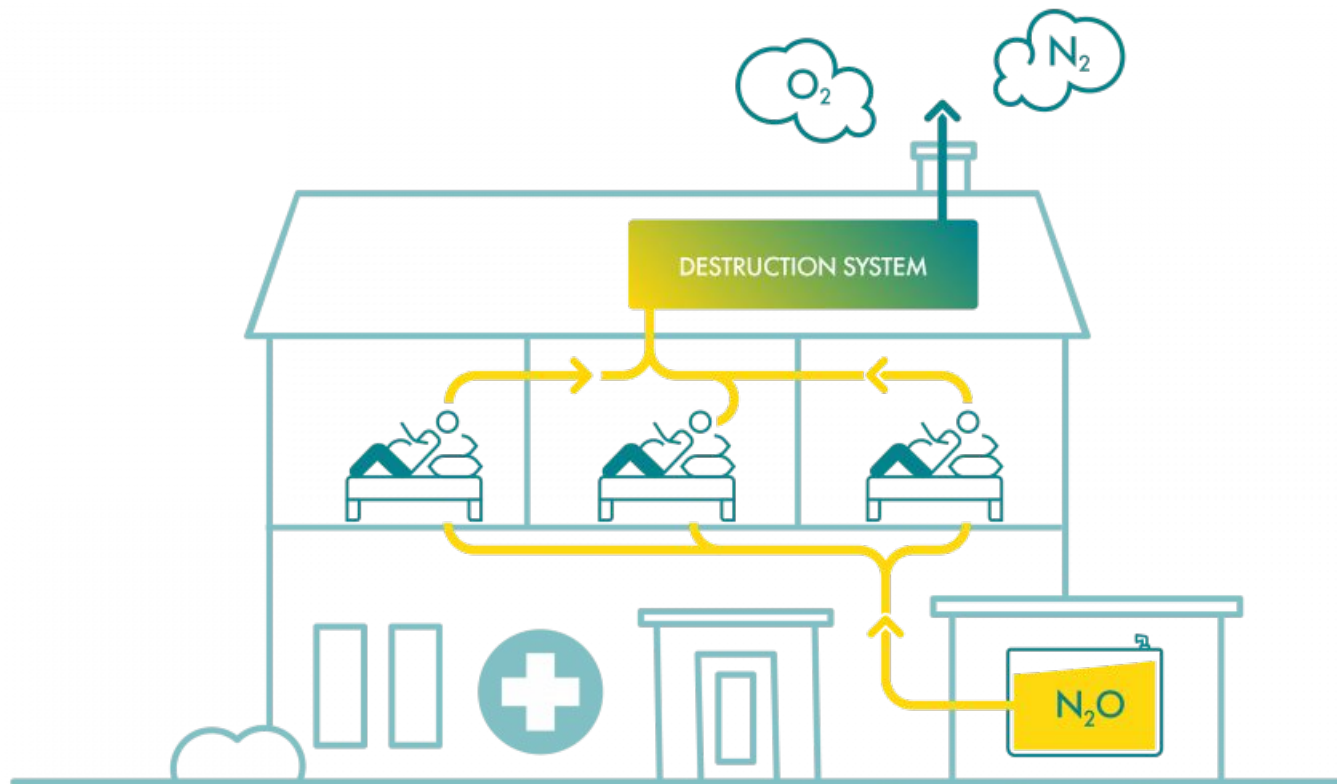

“TIVA som standard, gas när det behövs”

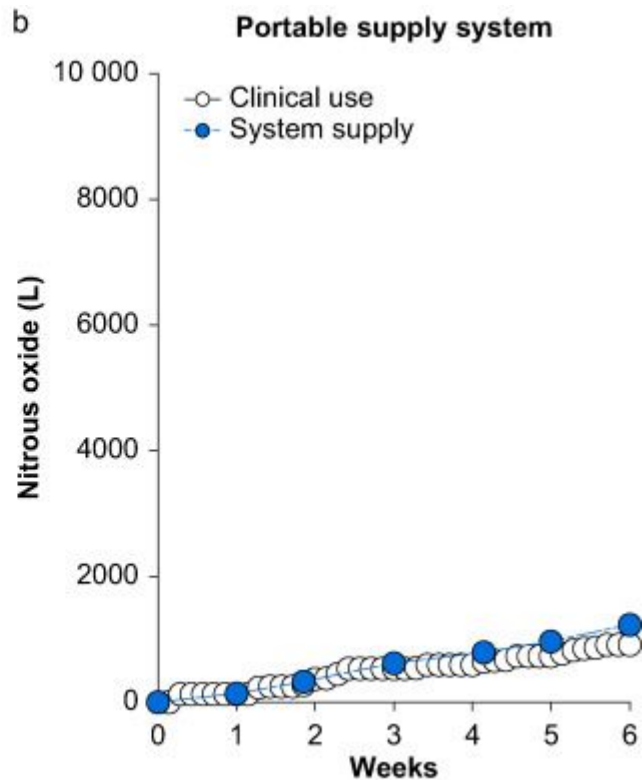

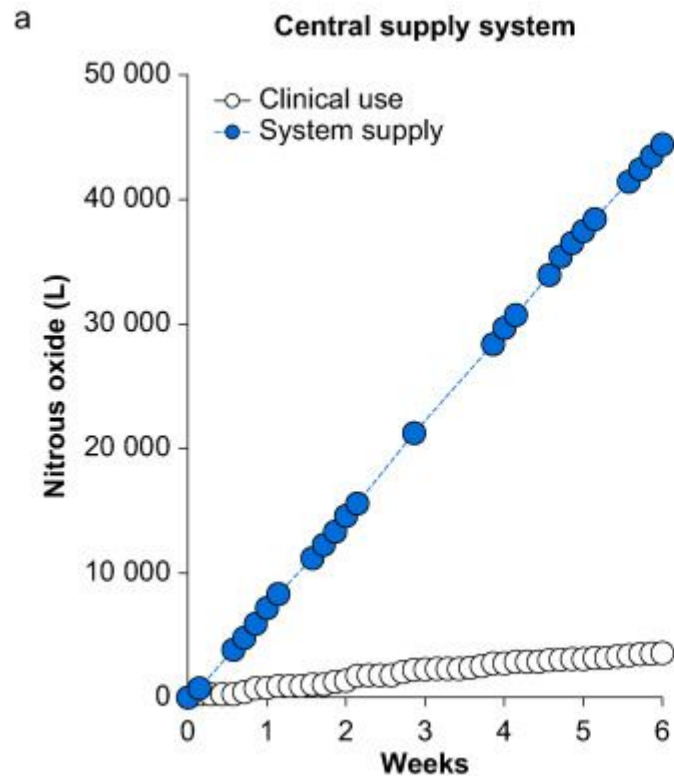

Nitrous oxide

Nitrous oxide läckage

	destruktion	kg läckage
Helsingborg	49%	1394
Malmö	25%	2098
Lund	19%	3844
Kristianstad	47%	836
Ystad	74%	135
Häs Äng Lkr	0%	75
Trelleborg	0%	667
Skåne	31%	9049
Förlossningsjukhus	33%	8307

N2O

Lustgassverige:
16 000 tonCO₂e per år
160 kgCO₂e per födsel

EDA/spinal/remifentanil PCA vs N2O
