

2<sup>ND</sup> Scandinavian Intensivist Meeting in  
Helsinki – Finland June 1-3, 2016

# ***IMPROVING OUTCOME IN CRITICAL CARE***

Keynote speakers Rinaldo Bellomo (AUS) & Rob Fowler (CAN)

[www.SIM2016.org](http://www.SIM2016.org)

**The Scandinavian Intensivist Meeting (SIM) is an initiative to enforce Scandinavian academic Intensive Care Medicine.**

For more than 20 years there has been a network of Scandinavian intensivists collaborating to strengthen intensive care medicine in Scandinavia. We now feel that a regular meeting-point would be advantageous to keep up and strengthen the network, and we hope the launching of the Scandinavian Intensivist Meeting will serve this purpose.

The concept is a biannual meeting in June in Helsinki – thematic, single-session, low-budget. Short presentations and plenty of time for discussions. Also room for reports from and discus-

sions on ongoing activities within SSCTG, SSAI and the national registries.

Our second meeting June 1-3 2016 will have 'Improving outcomes from intensive care' as its theme. The choice is obvious – as the presence of ICU registries in all Scandinavian countries give us exceptional possibilities. We hope that as many as possible of working groups using these registries, or in other ways focus upon ICU outcome, choose to come and share their work with us and each other.

Together we can develop Scandinavia academic intensive care medicine, and the presence of everybody as presenter or discussant will contribute.
