

**Lyssna på Ventilationens superstjärnor!**

NINETH HEDENSTIERNA LABORATORY MASTERCLASS SYMPOSIUM

# A physiological approach to Artificial Ventilation

Uppsala, 11<sup>th</sup> October 2019

Anders Larsson (Uppsala, Sweden)

**My life so far: from the Ambu balloon to synchrotron radiation computed tomography**

Peter Wagner (San Diego, USA)

**Mechanical ventilation through the eyes of a physiologist: does it really improve gas exchange?**

John Laffey, (Dublin, Ireland)

**What happens under the hood? Lessons of translational medicine about ARDS and ventilation**

Jeanine Weiner Kronish (Cambridge, USA)

**Optimizing intraoperative atelectasis may change perioperative outcomes?**

Paolo Pelosi (Genova, Italy)

**Strain, energy, power. The story on how physics invaded clinical ventilation**

Claude Guerin (Lyon, France)

**Looking at ventilation in three dimensions: flip the lung and rescue the patient**

Antonio Pesenti (Milano, Italy)

**Does the patient really know what is best? The breakthrough of self-induced lung injury**

Anmälan: Katja Andersson Anestesi och intensivvård, IKV, Uppsala Universitet,  
75185 Uppsala. Via e-post: [katja.andersson@surgsci.uu.se](mailto:katja.andersson@surgsci.uu.se)  
Anmälningsavgift: 1550 kr ex moms.
